Detailed Information about the Conference during IFAT India

The 3-day conference will feature a range of sessions with influential policymakers, regulators, startup founders, technology providers and sustainability experts. Topics will include sustainability strategies, regulatory frameworks and the roles of various stakeholders in advancing India's environmental goals. The conference aims to foster discussions on individual and collective civic responsibility through the lens of sustainability, explore legislators' visions for a Green India and examine how regulators plan to ensure effective implementation. It will also address how all relevant stakeholders can be held accountable in India's waste and water management journey.
